

Assignment 14.3

Name: Navya Revuri

2303A52483

Batch:44

Task 1:

Prompt:

#Generate complete working code for a responsive portfolio website using HTML, CSS, and JavaScript.

#Requirements:

#- Sections: About Me, Projects, Contact

#- Use Flexbox or CSS Grid

#- Add smooth scrolling navigation

#- Include modern colours and fonts

#- Provide full code (HTML with internal CSS and JS)

Lab 14.3 Portfolio.html > html > head > style

```

126        anchor.addEventListener('click', function (e) {
127          e.preventDefault();
128          document.querySelector(this.getAttribute('href')).scrollIntoView({
129            behavior: 'smooth'
130          });
131        });
132      });
133    </script>
134  </body>
135 </html>

```

Observation:

In this task, we designed a personal portfolio website using HTML, CSS, and JavaScript. The website includes sections like About Me, Projects, and Contact. We used AI tools to suggest colour combinations, fonts, and layout design. Smooth scrolling navigation and responsive design were implemented to

improve user experience. This task helped us understand how to create a simple and attractive portfolio website.

Task 2:

Prompt: #Generate complete HTML, CSS, and JavaScript code for a product page.

#Requirements:

#- Show product image, title, price

#- Add "Add to Cart" button

#- Use BEM naming in CSS

#- Add hover effects

#- Show alert when button is clicked

#- Provide full working code

lab 14.3 Store.html > html > head > style > body

```
9 <!DOCTYPE html>

  </div>

  <!-- Product 3 -->
  <div class="product">
    
    <h2 class="product__title">Watch</h2>
    <p class="product__price">$80</p>
    <button class="product__button" onclick="addCart('Watch')">Add to Cart</button>
  </div>
</div>

<script>
function addCart(productName) {
  alert(productName + " added to cart!");
}
</script>

</body>
</html>

```

#Generate complete HTML, CSS, and JavaScript code for a product page. #Requirements: #- Show product image, title, price #- Add "Add to Cart" button #- Use BEM naming in CSS #- Add hover effects #- Show alert when button is clicked #- Provide full working code

Observation: In this task, we created a product display page for an online store. The page shows product image, title, price, and an Add to Cart button. We used BEM methodology for CSS styling and added hover effects to improve design. JavaScript was used to display an alert when the button is clicked. AI tools helped in designing layout and improving the user interface.

Task 3:

Prompt:

#Generate complete code for an event registration form using HTML, CSS, and JavaScript.

#Requirements:

#- Fields: Name, Email, Phone, Session selection

#- Add JavaScript validation

#- Validate phone number length

#- Use labels and accessibility (ARIA)

#- Provide full working code

```

#- Provide full working code
<!DOCTYPE html>
<html lang="en">

5
6 <div class="container">
7   <h1>Event Registration</h1>
8
9   <form id="registrationForm" aria-label="Event Registration Form">
10
11     <div class="form-group">
12       <label for="name">Name:</label>
13       <input type="text" id="name" name="name" required aria-required="true">
14     </div>
15
16     <div class="form-group">
17       <label for="email">Email:</label>
18       <input type="email" id="email" name="email" required aria-required="true">
19     </div>
20
21     <div class="form-group">
22       <label for="phone">Phone:</label>
23       <input type="tel" id="phone" name="phone" required aria-required="true">
24     </div>
25
26     <div class="form-group">
27       <label for="session">Session:</label>
28       <select id="session" name="session" required aria-required="true">
29         <option value="">Select a session</option>
30         <option value="morning">Morning Session</option>
31         <option value="afternoon">Afternoon Session</option>
32         <option value="evening">Evening Session</option>
33       </select>
34     </div>
35
36     <button type="submit">Register</button>
37   </form>
38 </div>

```

```

    <button type="submit">Register</button>
  </form>
</div>

<script>
document.getElementById('registrationForm').addEventListener('submit', function(event) {
  const phone = document.getElementById('phone').value;

  if (phone.length !== 10 || isNaN(phone)) {
    event.preventDefault();
    alert('Please enter a valid 10-digit phone number.');
```

```

  } else {
    alert("Registration Successful!");
  }
});
</script>

</body>
</html>

```

Observation:

In this task, we developed an event registration form to collect user details such as name, email, phone number, and session selection. We implemented JavaScript validation to ensure correct input, especially for phone number. Accessibility features like labels and ARIA attributes were also included. AI tools helped in generating code and improving form design.

Task 4:

Prompt:

#Generate a one-page resume website using HTML and CSS.

#Requirements:

#- Sections: Profile Summary, Skills, Education, Experience

#- Use CSS Grid layout

#- Add professional fonts and styling

#- Add smooth scrolling navigation

#- Provide full code

    <p>Creamy pasta with rich sauce.</p>
    <p class="price">$10</p>
  </div>
</div>

<!-- Item 4 -->
<div class="card">
  
  <div class="card-content">
    <h2>Salad</h2>
    <p>Fresh healthy vegetable salad.</p>
    <p class="price">$6</p>
  </div>
</div>

</div>

</body>
</html>

```

#Generate a restaurant menu page using HTML and CSS. #Requirements: #- Display food name, description, price #- Use card-based layout #- Add food-style colors #- Add hover effects #- Make it responsive #- Provide full code

🍴 Restaurant Menu

Burger

Juicy grilled burger with fresh veggies.

\$8

Pizza

Cheesy pizza loaded with toppings.

\$12

Pasta

Creamy pasta with rich sauce.

\$10

Salad

Fresh healthy vegetable salad.

\$6

Observation: In this task, we designed a restaurant menu page using HTML and CSS. The menu displays food items with name, description, and price using a card-based layout. Attractive food-related colors and hover effects were added to enhance the design. The page was made responsive for different screen sizes. AI tools helped in generating layout and improving visual appearance.
